

Your Safety

Provide your family with the safety and security of non-combustible steel framing. Genesis steel framing is engineered to resist earthquakes and withstand higher wind speeds than wood framed homes.

Your Health

Genesis steel framing does not off-gas or sustain mould growth as softwood lumber does. This will provide better indoor air quality that can make a difference to those suffering with asthma or allergies.

Our Environment

The recycled steel from 8 scrap cars will build a 2,000 square foot steel framed home as opposed to 40-50 trees (or 1 acre) of forest if built with softwood lumber.
